

The image displays a vertical column of ten identical rectangular boxes, each designed for text entry. Each box is composed of three nested rectangular frames:

- An outermost frame defined by a green dashed line, representing the **Bleed Line**.
- A middle frame defined by a red solid line, representing the **Trim Line**.
- An innermost frame defined by a blue dashed line, representing the **Type Safety** area.

The boxes are arranged in a single column, separated by small gaps, and are intended for consistent text alignment and sizing across multiple instances.
