

Vector art is preferred. If you're using Photoshop, please trace artwork lines and convert text to shapes. A small fee will apply if we need to convert to vector ourselves or use bitmapped images.

Windowless/Clear/Tinted cassettes have a flat print area.

Opaque and Square Window have a raised center area and window.

You can print the entire standard print area (note the rounded corners.)

We can print beyond the standard print area for an extra cost.

Your art must be in its own layer. Do not merge your art into the template.
Only use the color BLACK to create your artwork. Specify the ink color in the layer name.
